

Thursday before Easter – Skärtorsdag!

Newsletter 2021-04-01

And 1st of April as well – be aware both of witches and silly jokes 😊

CULTURE GROUP

Now it's set – date and time for our first group discussion regarding "Corporate Culture".

21st of April, 11.00-12.30, either here at the office or remote. There is still room for more of us, just let Hanna or Eva know and you'll get an invite.

LEXHER OPENSIFT LAB

Happy greeting from Nico – the **OpenShift lab** is now **up and running!** Contact Nico if you want access.

RED HAT - New/Updated TRAININGS - COURSES

Red Hat Developing Application Business Rules with Red Hat Decision Manager Installation Lab (AD364)

Overview: Red Hat Decision Manager is an open source business automation platform that facilitates business policy and rules development, access, and management. By automating, adapting, and redesigning business rules, organizations can modernize their portfolio, empower employees, engage customers, and innovate their products. Decision Manager includes a fast and highly efficient rules automation engine with easy-to-use development tools that is ideal for organizations seeking to undergo a digital transformation.

Red Hat OpenStack Administration II: Infrastructure Configuration for Cloud Administrators (CL210)

Overview: This course is intended to develop the skills needed for the daily operation of a private cloud. A private cloud can reduce costs through fine-grained resource control, simplifying regulatory compliance, and permitting easier integration with legacy systems. Using the skills taught in this course, cloud operators will be able to manage and operate hybrid cloud Red Hat OpenStack Platform infrastructure.

Any Red Hat information from where you are? Do they need any more consultants, training or Red Hat software? Just ping Eva and she'll help you further!

Don't forget to keep an eye on our SLACK channels – lots of interesting information!

HAPPY EASTER!

Lexher Team
