

Good morning!

### CULTURE GROUP

Our second culture group meeting took place this week and we had a lot to discuss. You can follow all documentation from each meeting on intranet of course, full transparency 😊  
Attached picture shows how fun we can have. This time the meeting was digital.

One of the actions from the culture meeting was to create a new SLACK channel

#### # POST TO PUBLISH.

The idea came up when we discussed how to get more external visibility for customers, partners and potential coworkers. This channel opens up for everyone at Lexher to suggest postings in social media about our culture, competence worth sharing, meetups, interesting topics, events etc. Post your suggestions here and discuss them. Contact Eva or Hanna if any questions.

### MEETUP

Big success with the start of our meetups! More participants has to join, but this is just the beginning and presentations have been exquisite! Thank you **Niklas Lund** for the Python crash course, and thank you Red Hat for the training meetup.

Lexher - *Competence Worth sharing*. Soon we will announce our next meetup – keep your eyes open!

Documentation from the meetups, both the Red Hat training and from Niklas crash course are available on intranet.

### ASSIGNMENTS

We have currently many requirements from customers this week within AWS, Java, Devops and Project management.

### SUMMER ACTIVITY

Almost full attendance booked at our summer activity the 8th of June – fantastic!  
<https://intranet.lexher.se/nyheter/snart-dags-f%C3%B6r-lexher-aktivitet/>

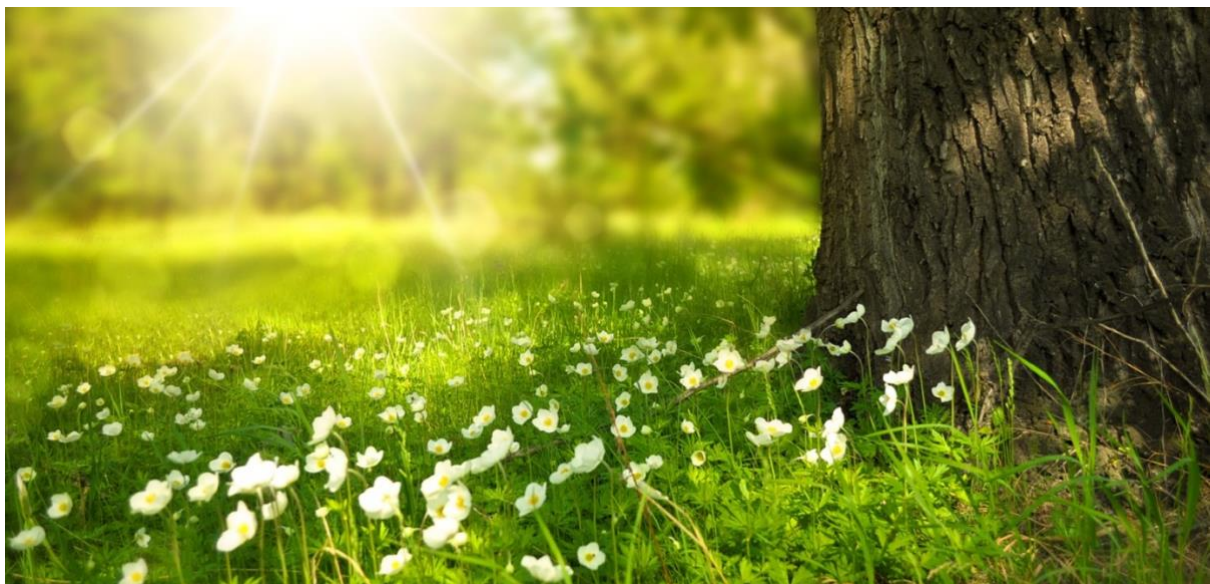

### NEW COLLEAGUES

Three new colleagues will start at Lexher during the autumn with competence within Linux, AWS and Devops.  
Introductions comes closer to start.

### VACATION

Time to plan for your summer vacation if not already done so. You put your vacation request in aspia.

*Have a fantastic weekend!*

**Lexher Team**
